

ENGINEERING

With our Technical, Mechanical and Electrical Departments we have developed new and diverse projects:

- Design and construction of new machine tools
- Pallet change system applications to match with new machines or to be integrated in existing machines (dimensions of pallet tables from 1000x1000 to 6000x2000)
- Personalised palletisation and made to manufacturers' specifications
- Spindle lines
- Tool changers
- Upgrading of special machines
- Compliance of different machinery, searching for the best possible solutions for the Customer which comply with the safety regulations in force.

Our products have been installed on machines of different national and European manufacturers with whom we co-operate.

We are able to satisfy your requests by customising the machines to your production needs.
