

## TECHNICAL CUSTOMER SERVICE

Thanks to the internal organisation and modern updated equipment used by our technicians, we perform interventions quickly and professionally. We carry out more than 1,500 interventions a year guaranteeing a global mechanical, electronic and software assistance service. Our technical departments provide steady support to assistance technicians bringing to each intervention the global experience of a structure and organisation at the top of its class. We are also able to provide Customers with proposals and preventive and scheduled maintenance contracts and to manage the documentation required by law.
